Nova Technologies Inc.

New Employee Onboarding Guide

Your First 90 Days at Nova Technologies

Welcome!

We are thrilled to have you join the Nova Technologies family. This guide will walk you through everything you need to know for your first 90 days — from setting up your accounts on Day 1 to becoming fully productive by the end of Month 3.

1. Before Your First Day

- ■ Complete your I-9 and tax forms via the onboarding portal link sent to your personal email.
- ■ Set up direct deposit in the payroll system (instructions in the onboarding portal).
- ■ Select your health insurance plan — you have 30 days from your start date to enroll.
- ■ Order your equipment if you are a remote employee (laptop, monitor, peripherals via IT portal).
- ■ Review this onboarding guide and the Employee Handbook.

2. Day 1 — Orientation

Your first day begins with a Welcome Orientation session from 9:00 AM to 12:00 PM. You will meet People Operations, receive your access credentials, and get a tour of the office (or a virtual orientation for remote employees).

- • 9:00 AM – Welcome session with People Operations
- • 10:00 AM – IT setup: laptop, email, Slack, and system access
- • 11:00 AM – Office tour or virtual team introductions
- • 12:00 PM – Lunch with your manager (company-sponsored)
- • 1:00 PM – Review tools, internal wiki, and team Slack channels

- 3:00 PM – Meet your onboarding buddy (assigned peer mentor)
- 4:30 PM – Wrap up and set goals for Week 1 with your manager

3. Week 1 — Getting Settled

The goal of Week 1 is to understand your team, tools, and immediate priorities. You are not expected to produce significant output this week — focus on learning.

Schedule 30-minute 1:1 intro meetings with each member of your immediate team. Ask them about their role, what they are currently working on, and how you can collaborate.

Required training modules (complete via the Learning Portal by end of Week 1):

- Information Security Awareness (45 min)
- Code of Conduct and Ethics (30 min)
- Data Privacy and GDPR Basics (30 min)
- Diversity, Equity & Inclusion Foundations (45 min)

4. Month 1 — Learning the Role

By the end of Month 1, you should have a clear understanding of your responsibilities, your team's current projects, and the tools you will use daily.

Your manager will schedule a formal 30-day check-in to discuss your progress, answer questions, and adjust your onboarding plan if needed.

You will be added to your first project in a learning capacity. Shadow your teammates, ask questions, and begin contributing to lower-stakes tasks.

5. Month 2 — Contributing

Month 2 is when you begin taking ownership of tasks and small projects. You should feel comfortable using all core tools and attending team meetings independently.

A 60-day check-in will be held with your manager. This is a two-way conversation — share any concerns, resource gaps, or support you need.

6. Month 3 — Full Productivity

By the end of Month 3, you are expected to be fully productive in your role. You will have completed all mandatory training, own a defined set of responsibilities, and have established working relationships across your team.

A 90-day formal review will be conducted. This feeds into your first performance record and helps set goals for the remainder of the year.

7. Key Contacts and Resources

Resource	Contact / Link
People Operations	people@novatech.com | ext. 5000
IT Helpdesk	it@novatech.com | ext. 5100
